Portfolio: <https://angeleefshaw.github.io/fullstack-portfolio/> · Github: <https://github.com/angeleefshaw>

## EXECUTIVE SUMMARY

---

Passionate and solutions-based full-stack web developer with an analytical mindset and the ability to solve problems quickly. Well adapted to both an independent and a collaborative environment. An avid learner and detail-oriented self-starter with superior communication skills and leadership qualities.

## WORK EXPERIENCE

---

### CMHWorks, Purcellville, VA

March 2021 - Current

Full Stack Software Developer

- Help to Troubleshoot, debug and upgrade software on .NetCore applications by providing a thorough analysis of issues while providing optimal solutions within an estimated time frame.
- Provide peer review of code via GitHub to ensure software is performant, any existing conflicts are resolved, and code quality is consistent across the code base.
- Used Typescript to write, debug, and refactor strongly typed and performant code within Angular framework.
- Used object oriented programming techniques, C#, and Typescript to create an AWS Lambda (designed to retrieve stored data only when needed) for the development of a CSV download feature.
- Regularly use HTML, CSS, and Bootstrap to implement responsive and cohesive design across the front-end of Angular applications.

### Search Peak Inc, Charlotte, NC

May 2019 - March 2021

Front End Developer

- Assisted in the creation of server-side static rendering of Javascript websites for search engine crawling best practices.
- Implemented custom frontend design of web projects on Wordpress sites through theme installation, customized site files, and API integration in PHP.
- Used Wordpress theme editor to design and construct pages and posts for multiple sites using HTML.

## EDUCATION
